

I am sending this comment to ask that you not allow any rulings or legal changes that would allow LPFM stations to displace the current stations operated by K-LOVE. Their programming has been very special to me and my family for several years and I believe the same is true for many families in our area. These days, it is difficult to find quality, family-friendly programming on the radio. More importantly, programming that supports good family values. K-LOVE delivers just that. In my opinion, K-LOVE needs more stations and coverage, not less. It is important enough to me that I contribute to them on a monthly basis, even though I cannot receive them in all of our city. I believe that K-LOVE is an invaluable community asset and is not one that should be displaced unfairly. They should have, at least, an equal opportunity for a broadcast license, if not more so since they are non-commercial, are supported by their listeners (which is evidence in itself that the community finds value in their stations, and broadcast only programming that is good for everyone. Thank you for your consideration of my plea.
